

SUPPORTING MOBILITY AND PROCEDURES COMMUNITY OF PRACTICE

The community of Practice (CoP) **“Supporting mobility and procedures, including entry conditions, social security, taxation”** is one of the six thematic CoPs established within the scope of project ERA TALENT: Platform for career development of researchers in Europe. CoPs primarily act as platforms for exchange of expertise and experience, best practice sharing and capacity building among the EURAXESS network members and external stakeholders.

The most pursued objective of this CoP is to address the issues related to entry and residence conditions (focus 2024) and social security issues (focus 2025).

The current CoP members are:

- Nuffic (the Netherlands)
- SAIA (Slovakia)
- NAWA (Poland)
- IUA (Ireland)
- AMPEU (Hungary)

We are looking for collaborators!

Let's bring together experts from the EURAXESS community in the field of mobility issues in order to work on the aforementioned topics and share the experience obtained so far. Experts:

- are people who have been working with these issues on a day to day basis or have gained some relevant experience based on the cases encountered.
- can be from different fields: staff dealing with social security including health insurance registrations, pension schemes evidence, payroll officers, HR consultants, lawyers, international relations officers, etc.

Each BHO can nominate experts on specific issues or individual EURAXESS members with relevant expertise can sign up themselves. Contact our CoP coordinator Evelien Hack via ehack@nuffic.nl.

Why join us?

- Engage with other colleagues from the EURAXESS network across Europe, dealing with similar issues.
- Share your experience via webinars, discussions, etc.
- Help identify and promote good practices and point out to areas that could be improved.
- Increase the visibility of your institution and the services it offers.
